

SWAB-ITS Firearms Products:

Part Number:

42-0017

Description: A pull-through design in .177/4.5mm caliber, the translucent whip functions as an empty chamber indicator (ECI). The Bore-Whip is particularly well suited for the demands of cleaning airguns, while being equally adept on centerfire and rim fire. A great range bag addition, the Bore-Whip simplifies cleaning and lubrication of more difficult to access guns. Contains three swabs.

Part Number:

42-0022

Description: A pull-through design in .22/5.56 caliber, the translucent whip functions as an empty chamber indicator (ECI). The Bore-Whip is particularly well suited for the demands of cleaning airguns, while being equally functional on centerfire and rim fire. A great range bag addition, the Bore-Whip simplifies cleaning and lubrication of more difficult to access guns like a Ruger 10/22 or Mark III. Contains three swabs.

Part Number:

41-0012

Description: 12ga Bore-tips are tough, reusable foam tips engineered for 100% bore contact; spreading fluids more evenly than mops and patches without lint or fibers. Their non-abrasive foam allows them to be run in both directions, while their absorbency requires less solvent/lubricant. Washable and reusable, they affix to a standard shotgun rod with 5/16-27 threading. For those with a .30 caliber rifle, the 12ga is also a perfectly sized chamber brush, allowing one to easily swab the receiver. Contains three swabs.

Part Number:

41-0020

Description: Gauge and caliber specific, Bore-tips are tough, reusable foam tips engineered for 100% bore contact; spreading fluids more evenly than mops and patches without lint or fibers. Their non-abrasive foam allows them to be run in both directions, while their absorbency requires less solvent/lubricant. Like all Swab-its products, the 20ga Bore-tips are washable and reusable. They affix to a standard shotgun rod with 5/16-27 threading. Contains three swabs.

Part Number:

41-2201

Description: .22/5.56 Bore-tips are tough, reusable foam tips engineered for 100% bore contact; spreading fluids more evenly than mops and patches without lint or fibers. Their non-abrasive foam allows them to be run in both directions, while their absorbency requires less solvent/lubricant. Washable and reusable, they affix to a standard rod with 8/32 threading. Contains six swabs.

Part Number:

41-2431

Description: Gauge and caliber specific, Bore-tips are tough, reusable foam tips engineered for 100% bore contact; spreading fluids more evenly than mops and patches without lint or fibers. Their non-abrasive foam allows them to be run in both directions, while their absorbency requires less solvent/lubricant. Washable and reusable, the .243 Bore-tip will clean your 6mm rifles as well as your .240. They affix to a standard rod with 8/32 threading. Contains six swabs.

Part Number:

41-3001

Description: Caliber specific, Bore-tips are tough, reusable foam tips engineered for 100% bore contact; spreading fluids more evenly than mops and patches without lint or fibers. Their non-abrasive foam allows them to be run in both directions, while their absorbency requires less solvent/lubricant. Washable and reusable, they affix to a standard rifle rod with 8/32 thread. Part Number:

81-1209

Description: Gun-tips are a strong and durable replacement for cotton swabs that do not leave lint and fibers behind. They come in four sizes and are flexible enough to round corners, but strong enough to resist breaking. Gun-tips are also washable and reusable. Used in conjunction with Bore-tips, Gun-tips allow you to clean and lubricate your entire firearm; especially beneficial in hard-to-reach areas. NOTE: each of these sizes is also available in individual bags of 24 pieces.

Part Number:

81-9056

Description: Gun-tips are a strong and durable replacement for cotton swabs that do not leave lint and fibers behind. They come in four sizes and are flexible enough to round corners, but strong enough to resist breaking. Gun-tips are also washable and reusable. The 3" Mini Tip swabs are especially effective for triggers and frames, slide rails, barrel lug recesses, barrel links, trigger assemblies, compensators, barrel extension, bolt cams, extractor ports and other hard-to-reach areas. Also great for applying lubrication or grease.

Part Number:

81-9001

Description: Gun-tips are a strong and durable replacement for cotton swabs that do not leave lint and fibers behind. They come in four sizes and are flexible enough to round corners, but strong enough to resist breaking. Gun-tips are also washable and reusable.
